

Terminal 2 Fast Facts

Facts, unless noted, refer to Terminal 2 once both phases are completed.

- Major elements
 - Two concourses featuring 36 gates
 - Large security checkpoint
 - Three island-style airline check-in counters to ease congestion in the lobby
 - Large baggage claim with five carousels
 - Large Federal Inspection Services facility for international travelers
- Two Phase Project
 - Phase One opened: October 26, 2008
 - Phase Two completion: Winter 2011
- At 920,000 square feet, Terminal 2 will be nearly three times larger than the former Terminal C.
- Three ticketing islands will each feature 20 traditional ticket counters.
- More than 60 electronic kiosks will be located throughout the airline check-in area.
- Terminal 2 will accommodate up to 11.4 million passengers each year.
- The new north concourse will feature 19 boarding gates.
- Three gates will accommodate wide body jets used for international flights.
- The north concourse is 650 feet longer than the Terminal C north concourse.
- Each concourse will feature two sets of moving walkways.
- The security checkpoint will accommodate up to 10 security checkpoint lanes.
- Additional space adjacent to the security checkpoint area is available to accommodate future changes in security technology and processes.
- The baggage claim area will feature five baggage carousels.
- A fully automated in line baggage screening system will screen all checked luggage as required by the Transportation Security Administration. This technology will remove the baggage screening equipment from the terminal lobbies.
- A Federal Inspection Services facility that is two times larger than the one in the former Terminal C. It will allow for the processing of up to 400 passengers per hour.
